

Bring Your Own Transport (BYOT) - How it Works

Ainslie School is committed to supporting a physically active, healthy and connected community. To equip young people and families with the skills and confidence to walk or ride to school, students are encouraged to bring their own form of transport to school and use it in purposeful play. BYOT runs at allocated times during the school day, which are communicated through the Altiora and the Ainslie School facebook page.

BYOT can include (and is not limited to) any of the following transport modes; bikes, scooters, skateboards, ripsticks, roller blades or skates or roller shoes. Equipment students bring is stored in the bike rack area or bike shed which will be locked until allocated BYOT session times.

Students are required to wear a helmet that meets the Australian Standards safety approval. They are also urged to wear any other protective equipment such as knee/elbow/wrist guards - which are essential on skateboards and ripsticks. Labeling equipment will support students as self managers.

Terms and Conditions:

- Equipment is only to be used during the allocated times with appropriate supervision.
- Students are to use their own equipment and will only use others' belongings if given permission.
- Students are to ride safely by knowing their limits and using equipment appropriately.
- Students and families need to be aware that the school cannot be held responsible for any damage to, or theft of equipment. Bike locks are encouraged.
- Students are required to wear a helmet that meets the Australian Standards at all times on all equipment.

Safety Checklist:

- Helmet fitted correctly and meets the Australian Standards safety approval
- Teacher/LSA supervision and meets ratio
- Equipment is in safe and working order
- Bike riders - ABC
 - A - Air (tyre pressure)
 - B - Brakes (working)
 - C - Chain (on and functioning)
